

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION V

DATE: OCT 23 1992

SUBJECT: Oversight Samples collected at the Nease Chemical
Superfund Site, Salem, Ohio

FROM: Sheila A. Sullivan *SAS*
Remedial Project Manager

TO: George Schupp, Chief
Quality Assurance Section

This memo concerns the analysis of split samples collected by our oversight contractor, B & V Waste Science Technology Corporation, during the Nease Chemical Site Remedial Investigation. The QAPP for oversight activities was partially approved on 10/17/89 for all Routine Analytical Services for the analysis of volatiles, BN/As, pesticide/PCBs, metals, cyanide, in residential wells and the analysis of dioxin in soil and water samples. Please note that, according to Jan Pels, a SAS request is not needed for dioxins/furans; a RAS request is all that is required.

Please contact me at 886-5251 if you have any questions about our oversight activities at this site.
